PRODUCT INFORMATION

UNIVERSAL APRON SUSPENDERS

RA-USUSP

Phillips Safety Universal Apron Suspenders provide additional comfort and support while wearing lead apron skirts during extended procedures. Made from a durable woven material and attachable with alligator clips, these suspenders help redistribute weight from the hips and lower back to the shoulders, helping reduce fatigue during long hours of wear.

The adjustable strap design allows users to customize the fit for enhanced comfort and stability, while the reinforced attachment points provide dependable support. Compatible with select Phillips Safety lead apron skirts, these lightweight black suspenders are an ideal accessory for improving everyday radiation protection wear.
