GENERAL BUNDLE E FLARED EDGE COATED POSITIONERS

PPFP-KIT9

The General Bundle E Flared Edge Coated Positioners is a kit that brings together a selection of foam positioners for patient support and positioning during medical imaging procedures. Designed for general imaging environments, it includes blocks, a head holder, wedges, a wedge set, and rectangle positioners for a range of positioning needs.

The General Bundle E includes **one of each** of the following:

- PPFP-PCAA – Adult Finger Oblique Flared Edge Coated Block
- PPFP-PCAK – Circular Head Flared Edge Coated Block
- PPFP-PCAM – Adult Flared Edge Coated Head Holder
- PPFP-PCBB – Medium 45 Degree Spinal Flared Edge Coated Wedge
- PPFP-PCBG – 21 Degree Flared Edge Coated Wedge
- PPFP-PCBI – 15 Degree Flared Edge Coated Wedge Set
- PPFP-PCBL – Small 3″ Flared Edge Coated Rectangle Positioner
- PPFP-PCBN – Large 3″ Flared Edge Coated Rectangle Positioner
- PPFP-PCBU – 30-60-90 Multi-Angle Flared Edge Coated Wedge

For added durability, a medical-grade, fluid-resistant coating covers each foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioners are radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design features flared edges that help significantly reduce artifacts during X-ray imaging. Although the flared sides increase the overall size of the positioners, they do not affect imaging or positioning.

Finally, the positioners included in General Bundle E are MRI Safe and latex-free. This makes the kit suitable for use across a variety of medical imaging environments.
