PRODUCT INFORMATION
STATIC TREATED AQUA TRANSFER BOARD

The Static Treated Aqua Transfer Board is a patient transfer board that makes transfers over uneven surfaces safe and simple. This Phillips Safety board easily slides on a bed or stretcher pad. It also prevents stress on the lower back of personnel when shifting patients. Made of semi-rigid polyethylene and covered with an anti-static coating, it protects patients from adhering and sticking to the surface while simultaneously reducing static build-up. It has rounded edges and is available in two different sizes: 18" W x 72" H x 3/16" thick and 22" W x 72" H x 3/16" thick. For easy positioning adjustments, the smaller size features 10 handles and the larger 12 handles, which can also be used to hang the transfer board in storage. In addition, the Anti Static Charcoal Gray Transfer Board is radiolucent, MR safe, and can be left under patients during procedures. It weighs 9 lbs and has a weight capacity of 250 lbs.

SPECIFICATION

SIZES: 18" W x 72" H x 3/16" thick

22" W x 72" H x 3/16" thick

WEIGHT: 9 lbs

WEIGHT CAPACITY: 250 lbs
