PATIENT RESTRAINT STRAP WITH MID PANEL AND 2 BUCKLES

The Patient Restraint Strap with Mid Panel and 2 Buckles is a safety strap designed to securely restrain patients. Made from thermoplastic urethane and featuring ultrasonically welded seams, it is the only high-level disinfectable surgical table strap. With its seamless design, these straps are easy to clean, devoid of puncture holes, stitching, or seams. This eradicates potential hiding spots for bacteria, significantly lowering the risk of cross-contamination. This innovative construction permits complete and repeated submersion in high-level disinfectants.

Furthermore, this Phillips Safety strap is universally compatible with all surgical tables and can be secured circumferentially around the table or through side rails. The Patient Restraint Strap with Mid Panel and 2 Buckles is also equipped with two lock-tight buckles and a mid-panel. The strap has a 2-inch width, a four different lengths, and a mid-panel measuring 5 inches wide by 18 inches long. In addition, it is available with two side rail hooks to anchor or remove the strap to the operating room table.

SPECIFICATION
