## PRODUCT INFORMATION

### SMALL PAPOOSE BOARD MRI SAFE

"The Small Papoose Board MRI Safe is an MRI Safe papoose board intended for infants. With a metal free design, this large board is a great selection for medical professionals to use during X-rays. The Phillips Safety papoose board operates on the prevent splint principle of binding the child to a rigid board to suppress struggling, thus resulting in a clean scan for the medical professional. In addition, with its canvas flaps a medical professional can effortlessly restrain a patient, and the four arm/wrist straps can provide additional arm immobilization. Utilizing selective restraint, the flaps can be open to scan the patient while they are still secure with the head and arm straps, all while providing great safety and security for the children. When using this board, you can immobilize a patient in 60 seconds or less, resulting in quick scans and reduced procedure times.

The complete set of the Small Papoose Board MRI Safe includes one board, a padded three-tier flap set, a padded head strap, as well as 4 arm/wrist straps. Weighing 3 lbs, the board is easy to move around and the hanging hole design results in easy storage. Made for infants, the board is 30" in length and 7" in width at its widest point. In addition, the latex-free and MRI-safe design provides a comfortable experience for the patient. For more options, check out our Papoose Boards and Accessories collection.

CAUTIONS: Use the restraint only under the supervision of a licensed medical practitioner and only when medically necessary for the safety and protection of the patient. Use the Board only for temporary restraint, never for continuous or long-term restraint. Make sure the restraint does not impair the patient's breathing or circulation, or cause overheating or positional injuries."

#### SPECIFICATION

**SIZE: SMALL**

**MATERIAL: NYLON**

**WEIGHT: 3 LBS BOARD**
