PRODUCT INFORMATION
REGULAR RADIOLUCENT PAPOOSE BOARD MRI SAFE

"The Regular Radiolucent Papoose Board MRI Safe is an MRI Safe papoose board intended for children from 2-5 years old. With a metal free design, this large board is a great selection for medical professionals to use during X-rays. The Phillips Safety papoose board operates on the prevent splint principle of binding the child to a rigid board to suppress struggling, thus resulting in a clean scan for the medical professional. In addition, with its canvas flaps a medical professional can effortlessly restrain a patient, and the four arm/wrist straps can provide additional arm immobilization. Utilizing selective restraint, the flaps can be open to scan the patient while they are still secure with the head and arm straps, all while providing great safety and security for the children.

The complete set of the Regular Radiolucent Papoose Board MRI Safe includes one board, a padded three-tier flap set, a padded head strap, as well as 4 arm/wrist straps. Weighing 4 lbs, the board is easy to move around and the hanging hole design results in easy storage. Made for children aged 2-5, the board is 37" in length and 11" in width at its widest point. In addition, the latex-free and MRI-safe design provides a comfortable experience for the patient. For more options, check out our Papoose Boards and Accessories collection.

CAUTIONS: Use the restraint only under the supervision of a licensed medical practitioner and only when medically necessary for the safety and protection of the patient. Use the Board only for temporary restraint, never for continuous or long-term restraint. Make sure the restraint does not impair the patient's breathing or circulation, or cause overheating or positional injuries."

SPECIFICATION

SIZE: REGULAR

MATERIAL: NYLON

WEIGHT: 4 LBS BOARD

COLOR: WHITE/BLUE/BLACK

Includes: one board 37" L x 11" W, a padded three-tier

flap set, a padded head strap, 4 arm/wrist straps
