PRODUCT INFORMATION
EXTRA LARGE RPAPOOSE BOARD MRI SAFE

The Extra Large Papoose Board MRI Safe is an MRI Safe papoose board intended for teenagers and adults. With a metal free design, this extra large board is a great selection for medical professionals to use during X-rays. The Phillips Safety papoose board is also great to use with patients that are frightened or injured, since it has restraints that prevent unnecessary movement, thus offering a clean scan. In addition, it prevents the patient from self-injury, providing great safety and security for teenagers and adults during scans.

The complete set of the Extra Large Papoose Board MRI Safe includes one board, a padded three-tier flap set, a padded head strap, as well as 4 arm/wrist straps. Weighing 12 lbs, the board is easy to move around and the hanging hole design results in easy storage. Made for adults and teenagers, the board is 60" in length and 17" at its widest point. In addition, the latex-free and MRI-safe design provides a comfortable experience for the patient. Please note that the board accommodates patients with a maximum girth of 40". Larger patients will require the use of extender flaps. For more options, check out our Papoose Boards and Accessories collection.

CAUTIONS: Use the restraint only under the supervision of a licensed medical practitioner and only when medically necessary for the safety and protection of the patient. Use the Board only for temporary restraint, never for continuous or long-term restraint. Make sure the restraint does not impair the patient's breathing or circulation, or cause overheating or positional injuries.
