PRODUCT INFORMATION
ANTI STATIC TREATED WHITE TRANSFER BOARD

The Anti Static Treated White Transfer Board is a patient transfer board that makes transfers over uneven surfaces safe and simple. This Phillips Safety board easily slides on a bed or stretcher pad, and prevents stress on the lower back of personnel when shifting patients. Made of semi-rigid polyethylene and covered with an anti-static coating, it protects patients from adhering and sticking to the surface while simultaneously reducing static build-up. With rounded edges, it features 12 handles for easy positioning adjustments, which can also be used to hang the transfer board in storage. In addition, the Static Treated White Transfer Board is radiolucent, MR safe, and can be left under patients during their procedures. It weighs 9 lbs and has a weight capacity of 250 lbs, with overall dimensions of 22" W x 72" H x 3/16" thick.
