

TRANSITION SAFETY GLASSES

MODEL 1205

FRAME INFORMATION

The Transition Safety Glasses 1205 are photochromic safety glasses that meet ANSI Z87 safety standards. They feature Transition gray lenses that turn clear indoors and gray in the sun, so you never have to change glasses when work brings you in and outdoors. Plus, its polycarbonate wraparound lenses offer a close fit and the best impact protection. The 1205 model features a rubberized nose bridge and soft rubber-tipped temples, making this frame style one of our most versatile. In addition, these glasses are assembled in the USA.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
