

# TRANSITION SAFETY GLASSES

## MODEL 901

### FRAME INFORMATION

The Transition Safety Glasses 901 are photochromic safety glasses that meet ANSI Z87 safety standards. They feature Transition gray lenses that turn clear indoors and gray in the sun, so you never have to change glasses when work brings you in and outdoors. Plus, it is made of high impact resistant plastic. The 901 model features a foam eyecup, as well as a removable strap to keep the glasses tight on your face. Assembled in the USA, these safety glasses are perfect for many industrial safety applications.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
