

# TRANSITION SAFETY GLASSES

## MODEL P820

### FRAME INFORMATION

The Transition Safety Glasses P820 are photochromic safety glasses that meet ANSI Z87 safety standards. They feature Transition gray lenses that turn clear indoors and gray in the sun, so you never have to change glasses when work brings you in and outdoors. Plus, this high-quality wrap around frame is made of unifit nylon and features rubberized nose pads for a secure fit.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
