

# TRANSITION SAFETY GLASSES

## MODEL 15011

### FRAME INFORMATION

The Transition Safety Glasses 15011 are photochromic safety glasses that meet ANSI Z87+ and CSA Z94.3 safety standards. These rectangular safety glasses are ideal for those that work both in indoor and outdoor segments, as they feature Transition gray lenses that turn from clear when indoors to gray when under the sun.

Made of high-quality TR-90 nylon, the 15011 model is lightweight, highly durable, and impact resistant. Plus, they feature adjustable rubberized nose pads and rubberized temples for a superior fit, as well as integrated side shields for additional lateral protection. In addition, the Transition Safety Glasses 15011 are available in eight color variations.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
