

TRANSITION SAFETY GLASSES

MODEL T6511

FRAME INFORMATION

The Transition Safety Glasses T6511 are photochromic safety glasses that meet ANSI Z87 safety standards. These rectangular safety glasses are ideal for those that work both in indoor and outdoor segments, as they feature Transition gray lenses that turn from clear when indoors to gray when under the sun.

Made of high-quality TR-90 nylon, the T6511 model is lightweight, highly durable, and chemical resistant. Plus, these safety glasses feature rubberized nose pads and rubberized temple bars for superior comfort. In addition, they are available in four color variations: Gray, Black, Blue, and Military Green.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
