PRODUCTS INC.

Phillips Safety is the industry leader in occupational safety eyewear. In business for over 100 years, you are being served with the dedication and craftsmanship of a family owned company.

Phillips Safety has been producing occupational safety glasses since 1905 and continues to develop and produce the highest quality glasses and lenses today. A leading manufacturer of specialty safety eyewear in the United States, Phillips Safety adheres to strict ANSI Z87-2+ and EN 207 CE standard certifications, holding itself to a highest standard and prides itself on producing glasses with the finest quality materials available.

All safety glasses produced and sold by Phillips Safety meet strict industry standards for military, medical, research laboratories, and a variety of other industries.

With Phillips Safety's dedicated team, you can rest assured knowing that all your prescription safety needs are met.

## CATEGORY INFORMATION

### LEAD MARKERS

Phillips Safety offers a collection of lead markers that can be a valuable aid in radiographic imaging, helping to identify important information like the anatomical side of the body. These lead markers provide a convenient and adaptable means of marking your x-ray images.

Constructed from a hard plastic material encased in durable aluminum channels, they also incorporate heavy metal alloy lettering. To enhance their longevity, all lettering is coated with crystal clear epoxy and the aluminum casing helps to optimize the resulting image on your film.

Phillips Safety's wide selection of x-ray lead markers includes a dozen different options to choose from. These markers are labeled with "right" and "left", "R" and "L", or arrows that can be used in any direction. By utilizing lead material for the lettering, these markers offer a high degree of visibility and legibility on x-ray images. Moreover, they can endure extended periods of exposure without fading.

**CATEGORY INFORMATION**  
**LEAD MARKERS**

In addition, the X-ray lead markers available at Phillips Safety are color-coded to indicate the side they represent, with “R” in red and “L” in blue. They also offer a diverse range of shapes, including square, circle, vertical rectangle, horizontal rectangle, heart-shaped, and more.

Our lead markers can be easily cleaned with soap and water, but we strongly advise against autoclaving them. Since they are made to order, they require a production time of 1-3 business days before shipping. At Phillips Safety it is also possible to personalize your markers with up to three initials, or opt for plain markers that are also made to order.
