Phillips Safety is the industry leader in occupational safety eyewear. In business for over 100 years, you are being served with the dedication and craftsmanship of a family owned company.

Phillips Safety has been producing occupational safety glasses since 1905 and continues to develop and produce the highest quality glasses and lenses today. A leading manufacturer of specialty safety eyewear in the United States, Phillips Safety adheres to strict ANSI Z87-2+ and EN 207 CE standard certifications, holding itself to a highest standard and prides itself on producing glasses with the finest quality materials available.

All safety glasses produced and sold by Phillips Safety meet strict industry standards for military, medical, research laboratories, and a variety of other industries.

With Phillips Safety's dedicated team, you can rest assured knowing that all your prescription safety needs are met.

Growers glasses are a type of eyewear designed specifically for individuals who cultivate plants, whether it's for commercial purposes or personal use. These glasses are engineered to enhance the growers' ability to observe the details of their crops with precision and accuracy. They are equipped with lenses that can filter out excessive light, allowing the growers to see only what is necessary without straining their eyes or causing washout.

Growers glasses also protect the eyes from harmful radiation, such as ultraviolet rays, and provide a comfortable viewing experience. With the help of these glasses, growers can detect potential issues with their crops earlier and make necessary adjustments to improve yield and quality.

Getting the maximum crop yield requires a light source with higher intensity than standard room lighting or even sunlight, making it impossible to observe crop details with the naked eye. To address this issue, Phillips Safety has developed an innovative system of specialty lenses that

effectively eliminate any extraneous energies and provide optimal viewing conditions.

Our collection of high-quality growers glasses allows you to observe all the intricate details that might have gone unnoticed before. Regardless of whether you use LED lighting or not, our glasses effectively eliminate any unwanted light and enable you to focus solely on what's important.

Phillips Safety's growers glasses are available in three different kinds of filters: metal halide, high pressure sodium, and LED. The Metal Halide glasses have a polycarbonate green lens filter with visible light transmission of 23%: the High Pressure Sodium glasses have polycarbonate purple lens filter with a visible light transmission of 27.2%; and the LED glasses have a polycarbonate green lens filter with visible light transmission of 23.3%. For each lens filter we offer a wide selection of models, with varying shapes, sizes, and styles to choose from.

The Metal Halide growview glasses 33 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 33 offer durability and lightweight comfort. Their rectangular fitover shape ensures a secure fit, and they feature adjustable temples and integrated side shields. Plus, these 33 growview glasses are available in black, combining style and functionality seamlessly.

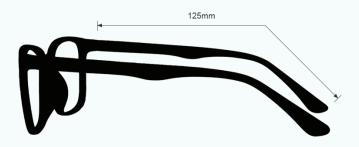

The Metal Halide growview glasses 506 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 506 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature rubberized nosepad and rubberized temples. Plus, these 506 growview glasses are available in black, combining style and functionality seamlessly.

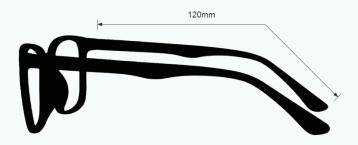

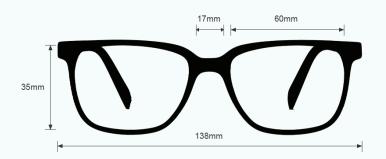

The Metal Halide growview glasses 703 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 703 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature rubberized nosepads. Plus, these 703 growview glasses are available in black, combining style and functionality seamlessly.

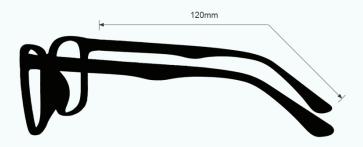

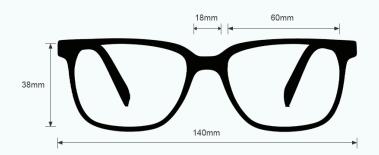

The Metal Halide growview glasses 808 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 808 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature rubberized nosepads and rubberized temple bars. Plus, these 808 growview glasses are available in red, black and silver, combining style and functionality seamlessly.

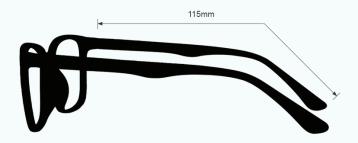

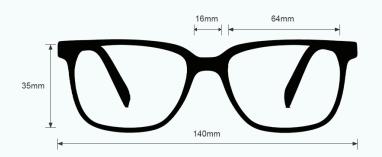

The Metal Halide growview glasses 901 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 901 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature a foam eyecup and a removable strap. Plus, these 901 growview glasses are available in black, combining style and functionality seamlessly.

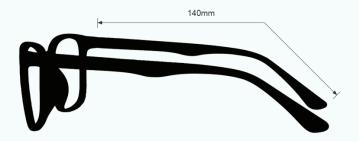

The Metal Halide growview glasses 1205 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 1205 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature rubberized nosepads and rubberized temple bars. Plus, these 1205 growview glasses are available in blue and black, combining style and functionality seamlessly.

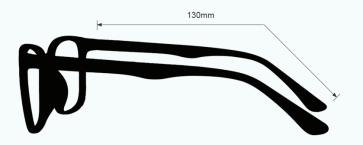

The Metal Halide growview glasses 1362 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses 1362 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature rubberized nosepads, rubberized temple bars, and a foam gasket. Plus, these 1362 growview glasses are available in black, combining style and functionality seamlessly.

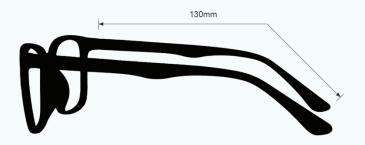

The Metal Halide growview glasses J136 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses J136 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature adjustable rubberized nosepads and rubberized temple bars. Plus, these J136 growview glasses are available in black, combining style and functionality seamlessly.

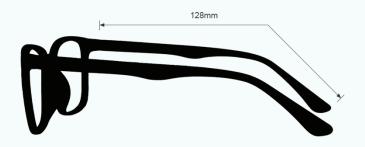

The Metal Halide growview glasses JY7 have a polycarbonate green lens filter that provides the protection you need. Boasting a visible light transmission of 23%, these glasses are designed to enhance your growing experience. Made of high-quality plastic, the Metal Halide Growview Glasses JY7 offer durability and lightweight comfort. Their wrap around shape ensures a secure fit, and they feature adjustable rubberized nosepads and a detachable foam gasket. Plus, these JY7 growview glasses are available in black and camouflage, combining style and functionality seamlessly.
