PRODUCTS INC.

Phillips Safety is the industry leader in occupational safety eyewear. In business for over 100 years, you are being served with the dedication and craftsmanship of a family owned company.

Phillips Safety has been producing occupational safety glasses since 1905 and continues to develop and produce the highest quality glasses and lenses today. A leading manufacturer of specialty safety eyewear in the United States, Phillips Safety adheres to strict ANSI Z87-2+ and EN 207 CE standard certifications, holding itself to a highest standard and prides itself on producing glasses with the finest quality materials available.

All safety glasses produced and sold by Phillips Safety meet strict industry standards for military, medical, research laboratories, and a variety of other industries.

With Phillips Safety's dedicated team, you can rest assured knowing that all your prescription safety needs are met.

CATEGORY INFORMATION
METAL HALIDE GROWVIEW GLASSES

Growers glasses are a type of eyewear designed specifically for individuals who cultivate plants, whether it's for commercial purposes or personal use. These glasses are engineered to enhance the growers' ability to observe the details of their crops with precision and accuracy. They are equipped with lenses that can filter out excessive light, allowing the growers to see only what is necessary without straining their eyes or causing washout.

Growers glasses also protect the eyes from harmful radiation, such as ultraviolet rays, and provide a comfortable viewing experience. With the help of these glasses, growers can detect potential issues with their crops earlier and make necessary adjustments to improve yield and quality.

Phillips Safety's growers glasses are available in three different kinds of filters, one of which is metal halide. Hydrospecs Metal Halide glasses are tailored to meet the needs of growers relying on metal halide lighting systems. Crafted with a polycarbonate green lens filter, these specialized eyewear pieces offer indispensable protection.

CATEGORY INFORMATION
METAL HALIDE GROWVIEW GLASSES

Boasting a visible light transmission rate of 23%, they strike the perfect balance between clarity and shielding.

Designed to mitigate the intense bluish-white spectrum emitted by metal halide lamps, our Hydrospecs Metal Halide glasses are a game-changer for cultivation enthusiasts. By selectively filtering out UV light and the specific wavelengths associated with metal halide illumination, these glasses alleviate the strain on your eyes. Bid farewell to discomfort and welcome extended periods of nurturing your plants with heightened visual precision.

With Hydrospecs CMH glasses, you can cultivate with confidence, knowing that your eyes are shielded from harsh lighting conditions. Experience unparalleled comfort and clarity as you delve into the intricate world of plant care, effortlessly attending to every detail with ease. Elevate your growing experience with Hydrospecs MH glasses, where protection meets performance.
