

TRANSITION SAFETY GLASSES

MODEL TP395

FRAME INFORMATION

The Transition Safety Glasses TP395 are photochromic safety glasses that meet ANSI Z87+ safety standards. These square, oversized safety glasses are ideal for those that work both in indoor and outdoor segments, as they feature Transition gray lenses that turn from clear when indoors to gray when under the sun.

Made of high-quality plastic, the TP395 model is lightweight, highly durable, and impact resistant. Plus, they feature rubberized nosepads and rubberized temple bars for a superior fit, as well as removable side shields for additional lateral protection. In addition, the Transition Safety Glasses TP395 are available in two color variations: Gray/Blue and Light Gray/Green.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
