**PHILLIPS SAFETY**  
PRODUCTS INC.

Phillips Safety is the industry leader in occupational safety eyewear. In business for over 100 years, you are being served with the dedication and craftsmanship of a family owned company.

Phillips Safety has been producing occupational safety glasses since 1905 and continues to develop and produce the highest quality glasses and lenses today. A leading manufacturer of specialty safety eyewear in the United States, Phillips Safety adheres to strict ANSI Z87-2+ and EN 207 CE standard certifications, holding itself to a highest standard and prides itself on producing glasses with the finest quality materials available.

All safety glasses produced and sold by Phillips Safety meet strict industry standards for military, medical, research laboratories, and a variety of other industries.

With Phillips Safety's dedicated team, you can rest assured knowing that all your prescription safety needs are met.

**CATEGORY INFORMATION**  
**GLASS OPTICAL FILTERS**

Phillips Safety specializes in providing the highest quality optical filter glasses and glass color filters, expertly crafted to meet your precise needs. Our selection is sourced exclusively from industry-leading manufacturers, Schott Glass and Hoya, ensuring that every filter meets the highest standards of optical clarity and performance. We understand that your requirements are unique. That's why we maintain an extensive stock of raw optical filter glass, ready to be transformed into the exact product you need. Our state-of-the-art manufacturing facility is equipped to handle orders of any size, shape, or thickness. Whether you're looking for a standard solution or a custom-designed piece, we can manufacture it quickly and efficiently. Our product range is comprehensive, encompassing all types of optical filters. Neutral Density Filters are perfect for controlling light intensity without altering the color profile. Longpass Filters are ideal for isolating longer wavelengths with precision. Contrast Enhancement Filters enhance image quality by improving contrast in a range of applications. Multi Bandpass Filters are expertly designed for applications requiring transmission of multiple specific wavelength ranges.

**CATEGORY INFORMATION**  
**GLASS OPTICAL FILTERS**

Shortpass Filters effectively block longer wavelengths while transmitting shorter ones. UV Bandpass Filters are specialized for applications requiring ultraviolet wavelength transmission. Heat Absorbing Filters are essential for protecting sensitive equipment from heat damage.

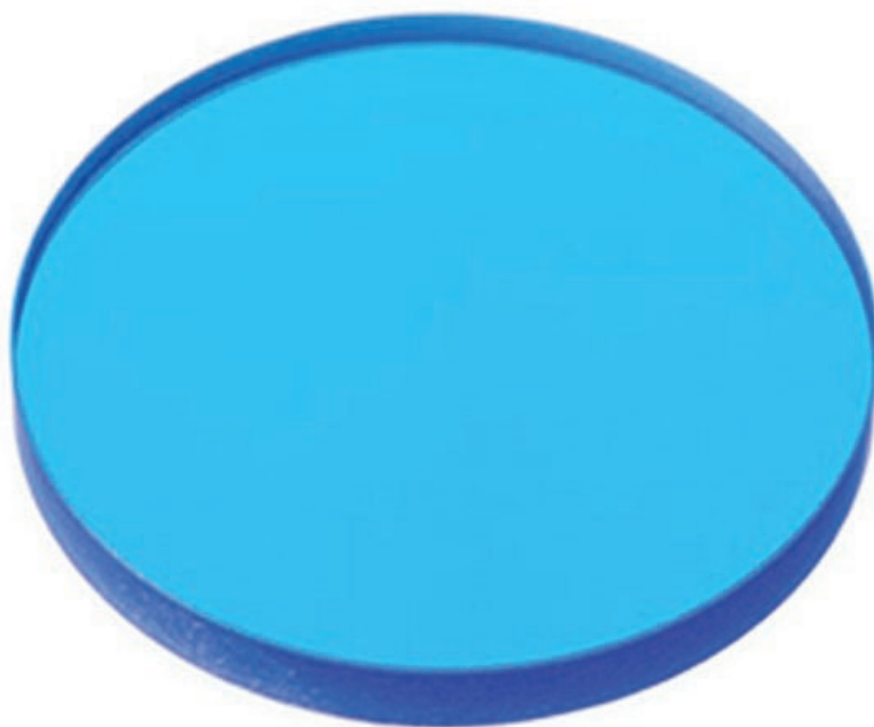

At Phillips Safety, customization is more than a service – it's a commitment to precision and adaptability. Our ability to grind any filter from 0.5mm to 5mm thick, combined with our state-of-the-art CNC cutters, allows us to craft filters in any shape or size, meeting nearly any tolerance requirement. To assist us in providing an accurate quote, please have your tolerances, thickness preferences, and if available, a technical drawing. This information will enable us to tailor our products to your exact specifications, ensuring that the filter you receive is the perfect fit for your application. Explore our collection of glass optical filters with confidence, knowing that you'll find the perfect solution tailored to your specific requirements. We're committed to providing you with the support and expertise you need for your optical filtration needs.

**CATEGORY INFORMATION**  
GLASS OPTICAL FILTERS

A large, stylized letter 'P' in a teal color serves as a background for the right side of the page. The 'P' is composed of thick, rounded strokes, with a central circle and a vertical stem that curves at the bottom.

GLASS OPTICAL**

**PRODUCT INFORMATION**  
HOYA B-370 FILTER GLASS

Blue Filters transmit light in the blue spectrum. They are used for 3-color separations, selection of wavelengths and color compensation. Application: Camera, Medical

**SPECIFICATION**

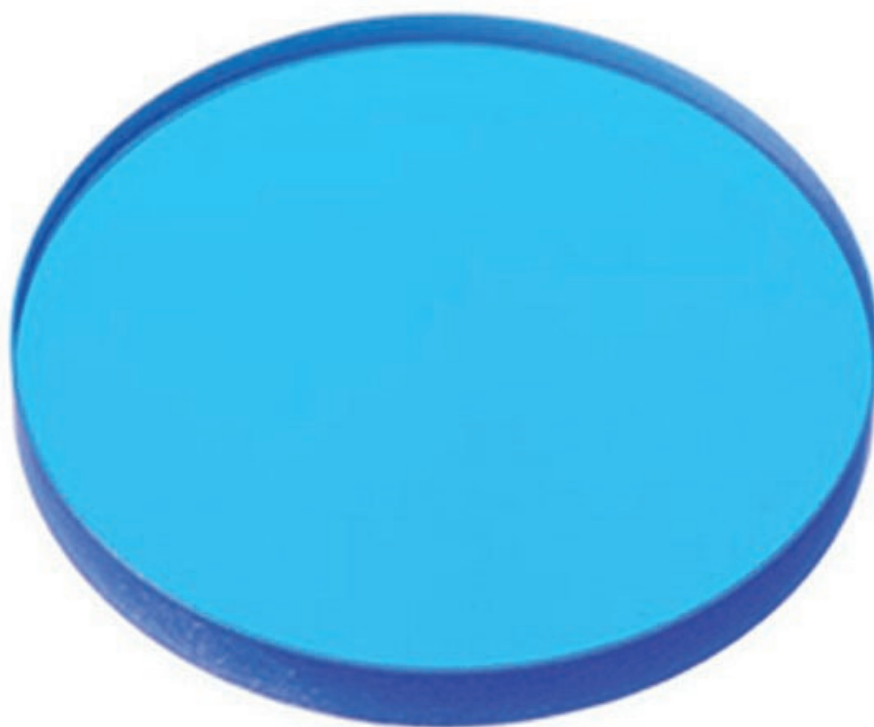

---

**Brand: Hoya**

**Optical Filter: Blue Filter**

**PRODUCT INFORMATION**  
HOYA B-410 FILTER GLASS

Blue Filters transmit light in the blue spectrum. They are used for 3-color separations, selection of wavelengths and color compensation. Application: Camera, Medical

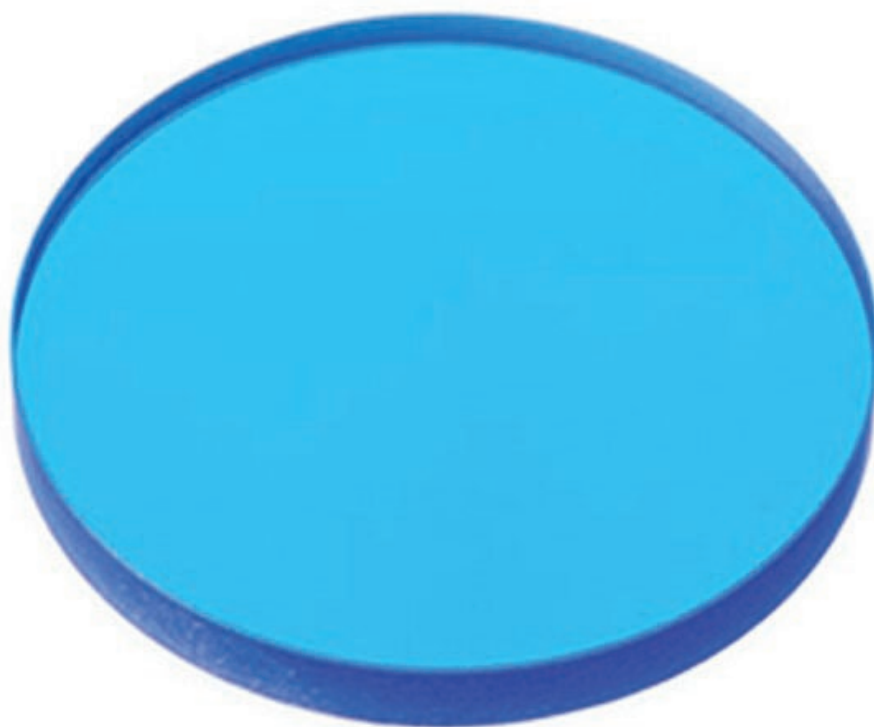

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Blue Filter**

**PRODUCT INFORMATION**  
HOYA B-440 FILTER GLASS

Blue Filters transmit light in the blue spectrum. They are used for 3-color separations, selection of wavelengths and color compensation. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Blue Filter**

**PRODUCT INFORMATION**  
HOYA B-460 FILTER GLASS

Blue Filters transmit light in the blue spectrum. They are used for 3-color separations, selection of wavelengths and color compensation. Application: Camera, Medical

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Blue Filter**

**PRODUCT INFORMATION**  
HOYA C500S FILTER GLASS

These filter types selectively absorb in the red and near-infrared wavelength regions and compensates for imaging sensitivity and exposure meter sensitivity. CD5000 features 0.45 mm as standard thickness and spectral characteristics equivalent to other C series with less than half of their thickness. Application: Camera, Display

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Color Compensating Filter**

**PRODUCT INFORMATION**  
HOYA C-5000 FILTER GLASS

These filter types selectively absorb in the red and near-infrared wavelength regions and compensates for imaging sensitivity and exposure meter sensitivity. CD5000 features 0.45 mm as standard thickness and spectral characteristics equivalent to other C series with less than half of their thickness. Application: Camera, Display

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Color Compensating Filter**

**PRODUCT INFORMATION**  
HOYA CD5000 FILTER GLASS

These filter types selectively absorb in the red and near-infrared wavelength regions and compensates for imaging sensitivity and exposure meter sensitivity. CD5000 features 0.45 mm as standard thickness and spectral characteristics equivalent to other C series with less than half of their thickness. Application: Camera, Display

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Color Compensating Filter**

**PRODUCT INFORMATION**  
HOYA CM-5000 FILTER GLASS

These filter types selectively absorb in the red and near-infrared wavelength regions and compensates for imaging sensitivity and exposure meter sensitivity. CD5000 features 0.45 mm as standard thickness and spectral characteristics equivalent to other C series with less than half of their thickness. Application: Camera, Display

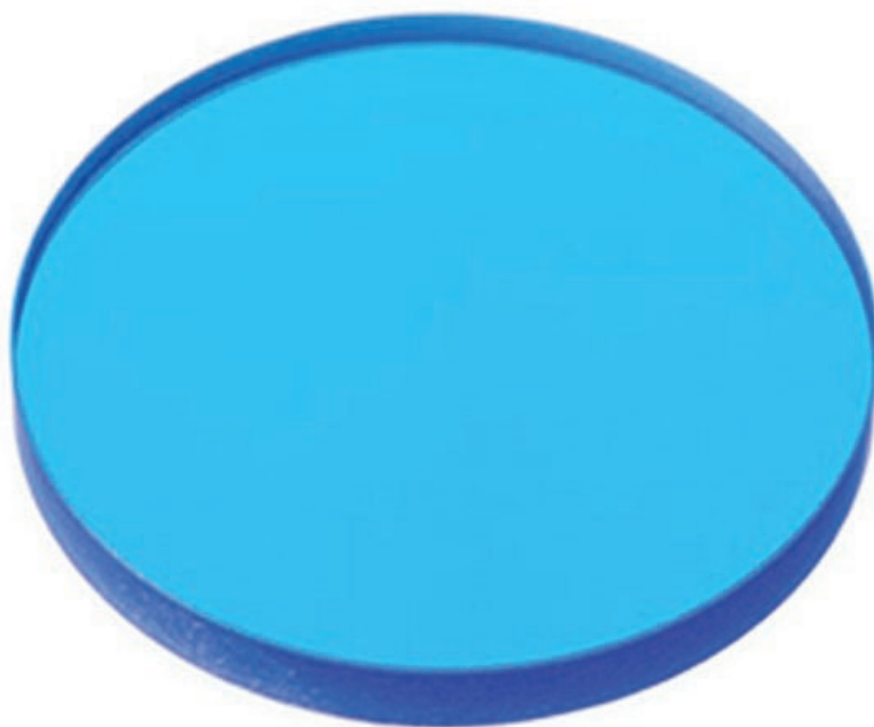

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Color Compensating Filter**

**PRODUCT INFORMATION**  
HOYA E-B390 FILTER GLASS

Blue Filters transmit light in the blue spectrum. They are used for 3-color separations, selection of wavelengths and color compensation. Application: Camera, Medical

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Blue Filter**

**PRODUCT INFORMATION**  
HOYA E-CM500S FILTER GLASS

These filter types selectively absorb in the red and near-infrared wavelength regions and compensates for imaging sensitivity and exposure meter sensitivity. CD5000 features 0.45 mm as standard thickness and spectral characteristics equivalent to other C series with less than half of their thickness. Application: Camera, Display

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Color Compensating Filter**

**PRODUCT INFORMATION**  
HOYA E-LA80 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

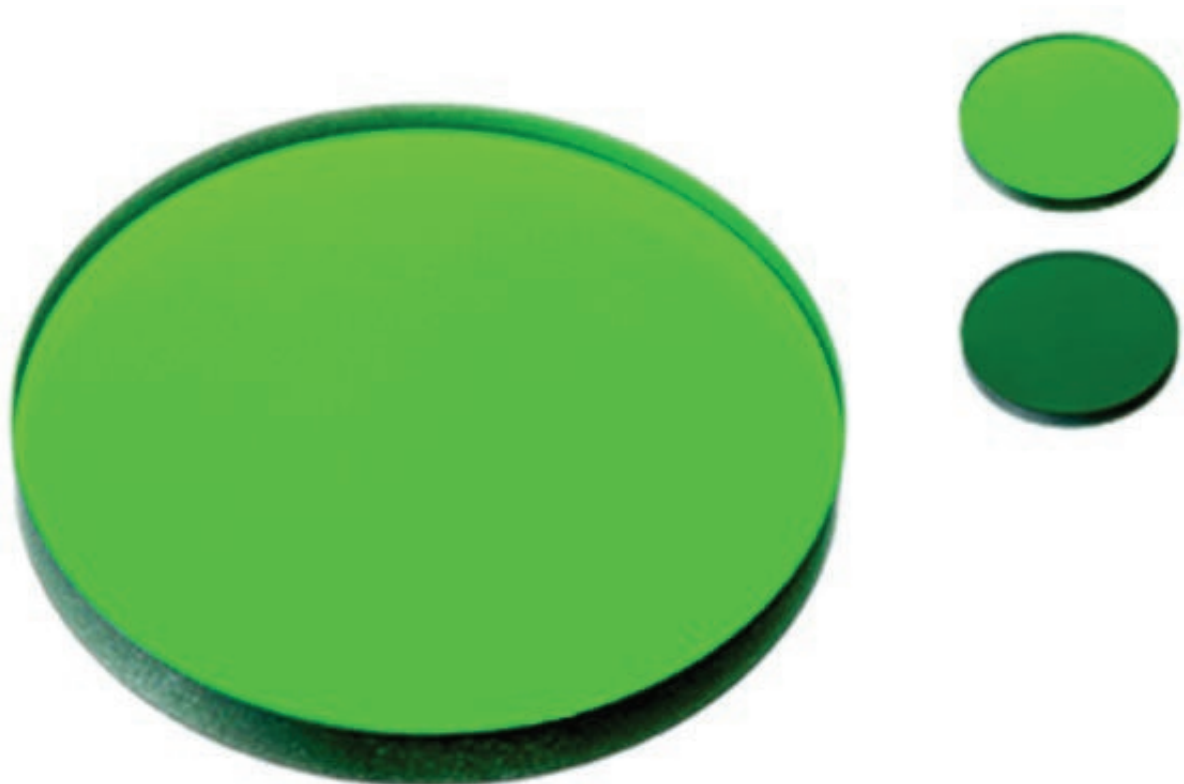

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA G530 FILTER GLASS

Green Filters transmit a relatively narrow wavelength band centered around light in the green spectrum. They are used as contrast-effect filters for black and white photography, and also as 3-color separation filters. Bond these filters and sharp cut filters together to attain the maximum transmittance at a specific wavelength or to absorb light of shorter wavelengths. Application: Camera, Display

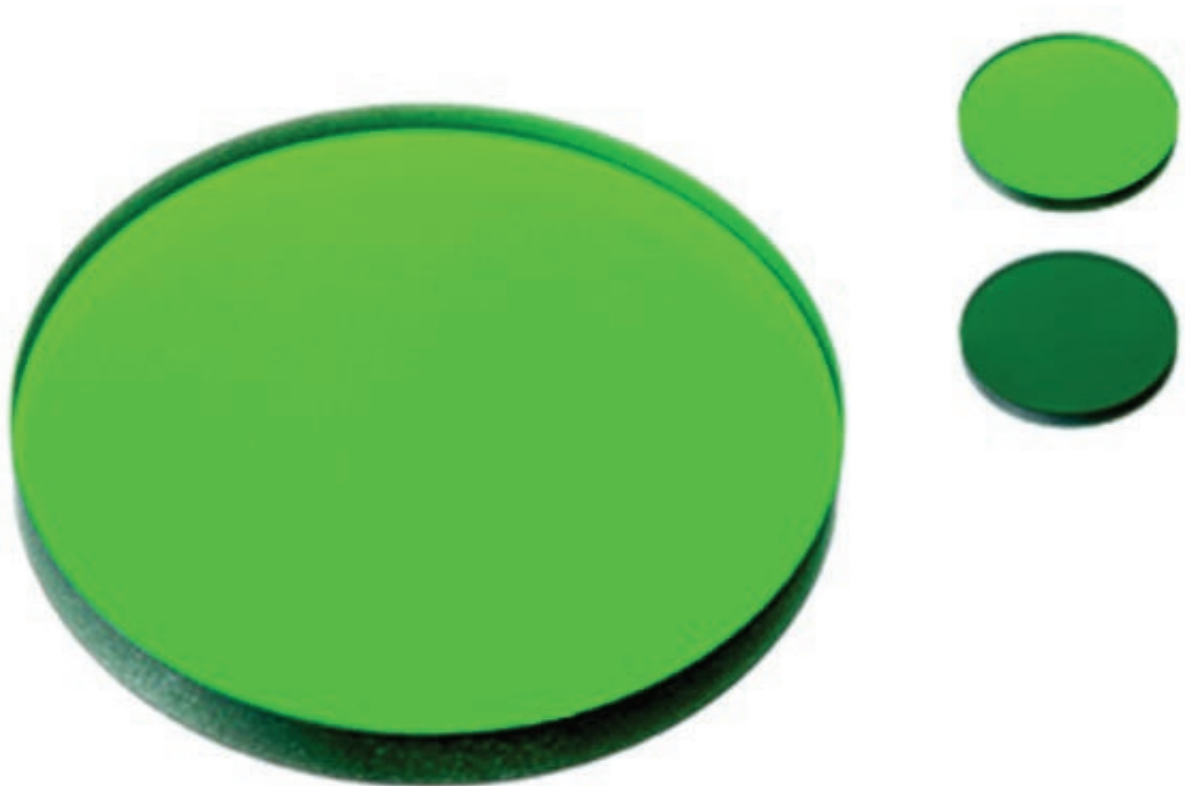

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Green Filter**

**PRODUCT INFORMATION**  
HOYA G533 FILTER GLASS

Green Filters transmit a relatively narrow wavelength band centered around light in the green spectrum. They are used as contrast-effect filters for black and white photography, and also as 3-color separation filters. Bond these filters and sharp cut filters together to attain the maximum transmittance at a specific wavelength or to absorb light of shorter wavelengths. Application: Camera, Display

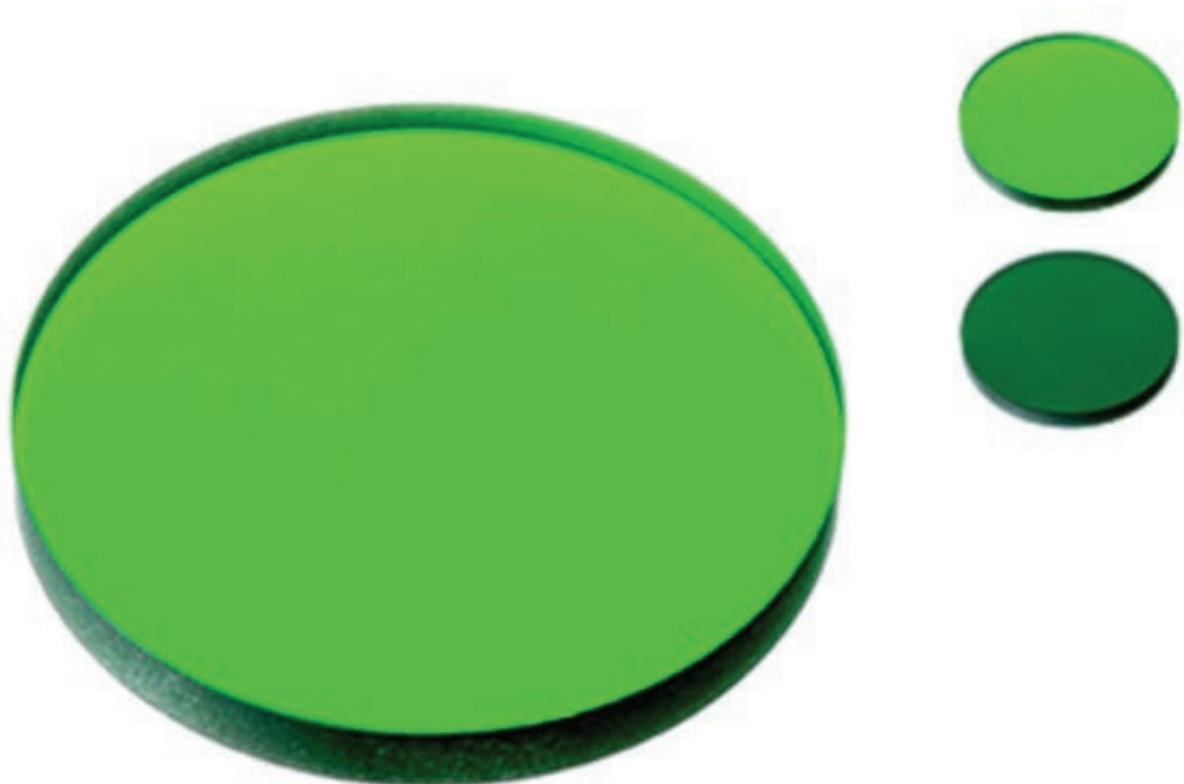

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Green Filter**

**PRODUCT INFORMATION**  
HOYA G545 FILTER GLASS

Green Filters transmit a relatively narrow wavelength band centered around light in the green spectrum. They are used as contrast-effect filters for black and white photography, and also as 3-color separation filters. Bond these filters and sharp cut filters together to attain the maximum transmittance at a specific wavelength or to absorb light of shorter wavelengths. Application: Camera, Display

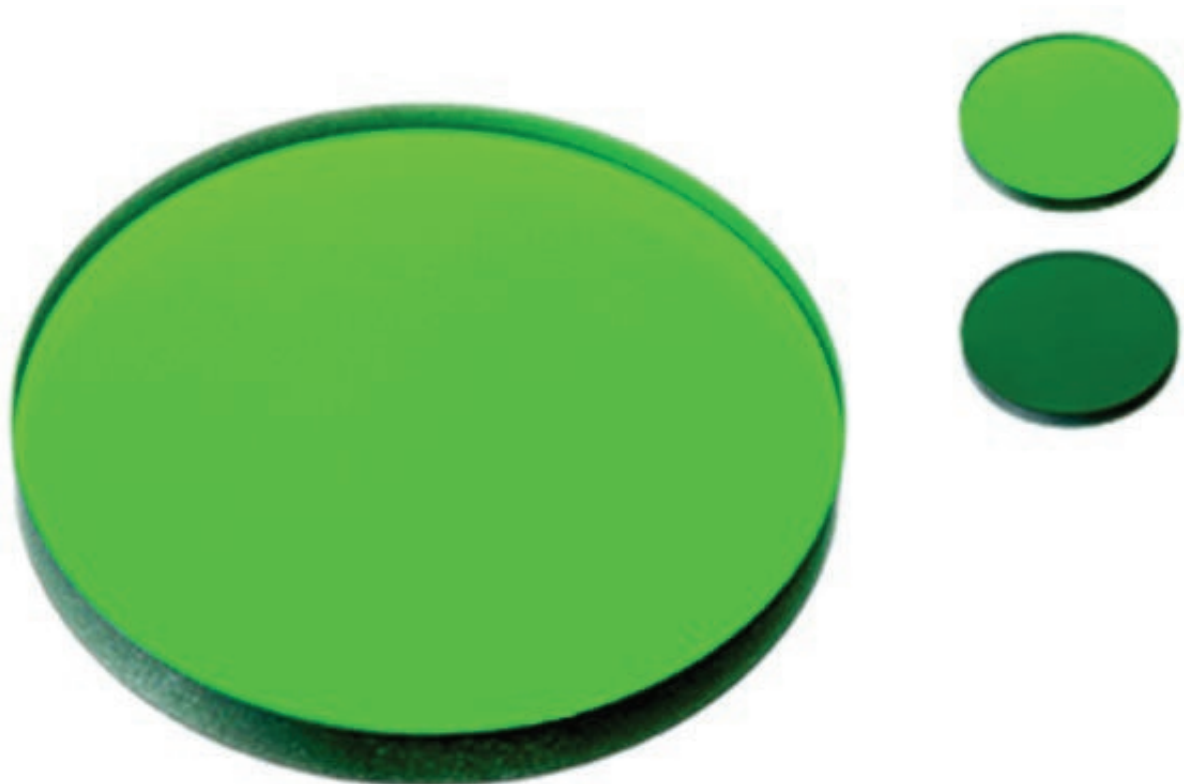

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Green Filter**

**PRODUCT INFORMATION**  
HOYA G550 FILTER GLASS

Green Filters transmit a relatively narrow wavelength band centered around light in the green spectrum. They are used as contrast-effect filters for black and white photography, and also as 3-color separation filters. Bond these filters and sharp cut filters together to attain the maximum transmittance at a specific wavelength or to absorb light of shorter wavelengths. Application: Camera, Display

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Green Filter**

**PRODUCT INFORMATION**  
HOYA HA-5 FILTER GLASS

Heat Absorbing Filters feature high transmittance in the visible region and good absorption of heat rays (infrared rays). They efficiently absorb thermal radiation emitted from light sources and are highly effective when employed for slide projectors and illumination equipment. To prevent a Filter Glass from being broken by rapid heating or cooling, this filter can be also provided as a thermal toughening tempered glass. Application: Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Heat Absorbing Filter**

**PRODUCT INFORMATION**  
HOYA HA-15 FILTER GLASS

Heat Absorbing Filters feature high transmittance in the visible region and good absorption of heat rays (infrared rays). They efficiently absorb thermal radiation emitted from light sources and are highly effective when employed for slide projectors and illumination equipment. To prevent a Filter Glass from being broken by rapid heating or cooling, this filter can be also provided as a thermal toughening tempered glass. Application: Medical

## **SPECIFICATION**

**Brand: Hoya**

**Optical Filter: Heat Absorbing Filter**

**PRODUCT INFORMATION**  
HOYA HA-30 FILTER GLASS

Heat Absorbing Filters feature high transmittance in the visible region and good absorption of heat rays (infrared rays). They efficiently absorb thermal radiation emitted from light sources and are highly effective when employed for slide projectors and illumination equipment. To prevent a Filter Glass from being broken by rapid heating or cooling, this filter can be also provided as a thermal toughening tempered glass. Application: Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Heat Absorbing Filter**

**PRODUCT INFORMATION**  
HOYA HA-50 FILTER GLASS

Heat Absorbing Filters feature high transmittance in the visible region and good absorption of heat rays (infrared rays). They efficiently absorb thermal radiation emitted from light sources and are highly effective when employed for slide projectors and illumination equipment. To prevent a Filter Glass from being broken by rapid heating or cooling, this filter can be also provided as a thermal toughening tempered glass. Application: Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Heat Absorbing Filter**

**PRODUCT INFORMATION**  
HOYA IR76N FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA IR80N FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA IR83N FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA IR85N FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA L37 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA L38 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA L39 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA L42 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA LA20 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA LA40 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA LB40 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA LB80 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

## **SPECIFICATION**

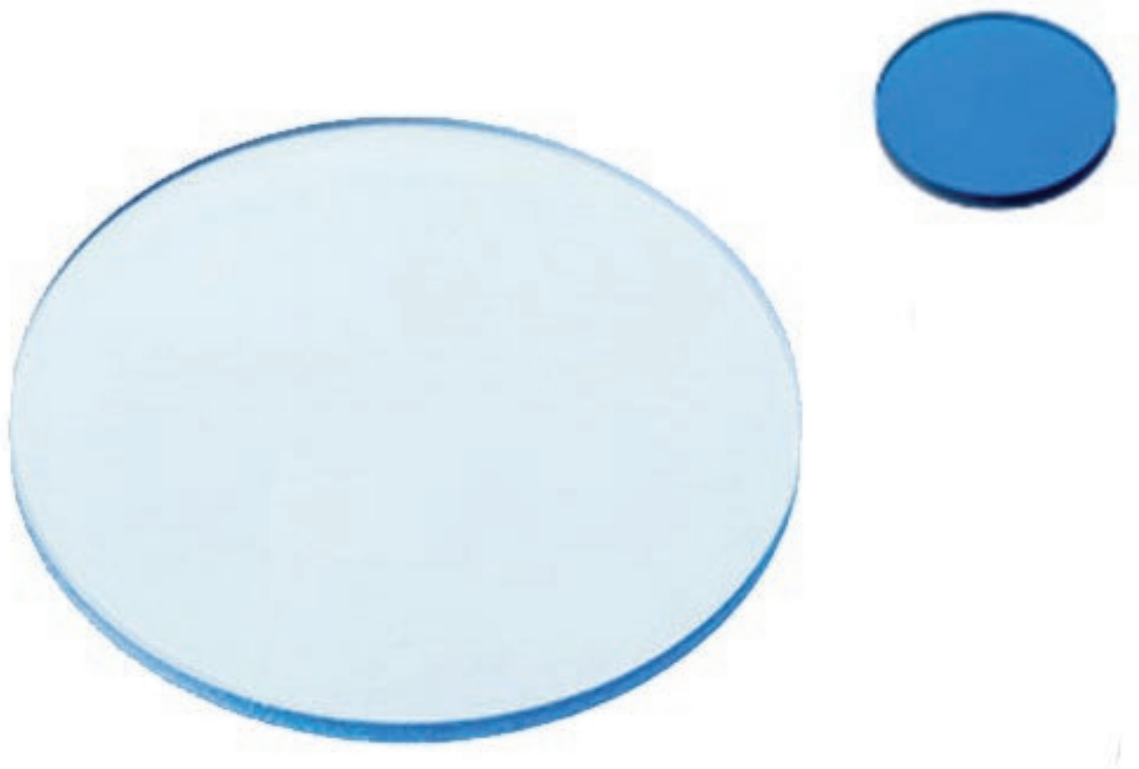

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA LB120 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA LB200 FILTER GLASS

The features of these filters include gradually increasing or decreasing the transmittance in the visible range. This type of filter is used for converting or controlling color temperature when photographing. Adjust the polished thickness to create a filter with the capacity for any color temperature conversion. Application: Camera, Inspection Device

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Light Balancing Filters**

**PRODUCT INFORMATION**  
HOYA NDO.3 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA ND006 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA ND13 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA ND25 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA ND40 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA ND50 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

**SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA ND70 FILTER GLASS

These filters possess level spectral transmittance characteristics in the visible region independent of wavelength. They are ideal for exposure control in color photography, and are also used for light control in other measuring instruments. They are designed to uphold designated performance capabilities through controlling the thickness.

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Neutral Density**

**PRODUCT INFORMATION**  
HOYA O54 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA O56 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA O58 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA R60 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA R62 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA R64 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA R66 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. Application: Camera, Medical

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Sharp Cut Filter**

**PRODUCT INFORMATION**  
HOYA RM90 FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA RM100 FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA RT830 FILTER GLASS

Infrared Transmitting Filters absorb most of the visible region and transmit the infrared region. They are widely used in light sources for purposes such as infrared warning systems and night-vision equipment. Application: Camera, Medical, Security

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: Infrared Transmitting Filters**

**PRODUCT INFORMATION**  
HOYA U325C FILTER GLASS

Ultraviolet Transmitting, Visible Absorbing Filters transmit the ultraviolet region but absorb the visible region. These filters are chiefly used for single extraction of ultraviolet rays. They are often utilized for selectively transmitting the 253.7 nm and 365 nm wavelengths, which are the representative line spectra of mercury lamps. Application: Medical, Inspection Device, Lighting

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: UV Transmitting Visible Absorbing Filters**

**PRODUCT INFORMATION**  
HOYA U330 FILTER GLASS

Ultraviolet Transmitting, Visible Absorbing Filters transmit the ultraviolet region but absorb the visible region. These filters are chiefly used for single extraction of ultraviolet rays. They are often utilized for selectively transmitting the 253.7 nm and 365 nm wavelengths, which are the representative line spectra of mercury lamps. Application: Medical, Inspection Device, Lighting

## **SPECIFICATION**

---

**Brand: Hoya**

**Optical Filter: UV Transmitting Visible Absorbing Filters**

HOYA W-R645 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. The "W series" meets the requirements of the market in all aspects. Data shows in the chart indicates in Internal Transmittance. Application: Camera, Security

**SPECIFICATION**

**Brand:** Hoya  
**Optical Filter:** Sharp Cut Filter

**PRODUCT INFORMATION**  
HOYA W-R665 FILTER GLASS

Sharp cut filters are longpass filters that cut off the wavelength light shorter than a specific wavelength as much as possible, while transmitting the longer wavelength light as much as possible, within a wavelength range of 350 nm to 800 nm. The "W series" meets the requirements of the market in all aspects. Data shows in the chart indicates in Internal Transmittance. Application: Camera, Security

**Optical Filter: Sharp Cut Filter**

## PRODUCT INFORMATION

### SCHOTT BG-3 FILTER GLASS

Schott Filter Glass BG-3 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## SPECIFICATION

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

## PRODUCT INFORMATION

### SCHOTT BG-7 FILTER GLASS

Schott Filter Glass BG-7 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## SPECIFICATION

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-18 FILTER GLASS**

Schott Filter Glass BG-18 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-25 FILTER GLASS**

Schott Filter Glass BG-25 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-36 FILTER GLASS**

Schott Filter Glass BG-36 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-38 FILTER GLASS**

Schott Filter Glass BG-38 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-39 FILTER GLASS**

Schott Filter Glass BG-39 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
SCHOTT BG-40 FILTER GLASS

Schott Filter Glass BG-40 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-42 FILTER GLASS**

Schott Filter Glass BG-42 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT BG-55 FILTER GLASS**

Schott Filter Glass BG-55 Bandpass Filter. Schott Filter Glasses come standard 6.5" X 6.5" But we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
SCHOTT GG-395 FILTER GLASS

Schott Filter Glass GG-395 Longpass Filter. Schott Filter Glasses come standard 6.5" X 6.5." However, we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
SCHOTT GG-400 FILTER GLASS

Schott Filter Glass GG-400 Longpass Filter. Schott Filter Glasses come standard 6.5" X 6.5." However, we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.

## **SPECIFICATION**

---

**Brand: Schott Glass**

**Standard Size: 6.5" x 6.5"**

**PRODUCT INFORMATION**  
**SCHOTT GG-420 FILTER GLASS**

Schott Filter Glass GG-420 Shortpass Filter. Schott Filter Glasses come standard 6.5" X 6.5." However, we can grind, polish and cut to any specifications you may require. We stock the glass in an unpolished form, so we can also supply whatever thickness that you require. We offer volume discounts as long as pieces are being made to the same thickness.
