

LEAD APRONS

ABOUT US

Phillips Safety is a recognized leader in radiation protection, designing and manufacturing high-quality radiation safety products and specialized PPE. Family-owned and operated for over 100 years, we are known for precision manufacturing, technical expertise, and an unwavering commitment to protecting professionals working in high-risk environments.

Our leadership in radiation safety began with protective eyewear and has expanded to a comprehensive portfolio of radiation apparel, barriers, shielding drapes, and custom solutions used in medical, industrial, research, and veterinary settings. Today, Phillips Safety products are trusted in fluoroscopy suites, cath labs, operating rooms, radiology departments, and interventional environments worldwide.

At the core of our radiation apparel is Axion Core™ technology—advanced lead-free and low-lead composite materials engineered to provide dependable radiation attenuation with reduced weight and improved comfort. Available in Axion Core 1000, 2000, and 3000, these core options are designed to balance protection, durability, and ergonomics to meet the needs of a wide range of users.

All Phillips Safety products are manufactured to meet applicable safety and regulatory standards, including Regulation (EU) 2016/425, and are tested in accordance with EN 61331 standards. Through vertical integration and in-house expertise, Phillips Safety continues to deliver reliable, innovative radiation protection solutions professionals can trust.

LEAD APRONS

At Phillips Safety, our lead aprons are meticulously crafted in the USA with the wearer's comfort, protection, and style in mind, providing an ideal balance of weight and functionality.

Our aprons use top-quality barrier material that excels in both hygiene and comfort, making it the best choice on the market. This advanced barrier provides additional protection, as the inner and outer materials prevent pathogens, liquids, and solid particles from reaching the body.

While our Quick Ship aprons ship within 24 hours, custom aprons are available and typically ship in 2-5 business days. Custom aprons can be tailored to your exact measurements and preferences, providing an ideal fit and optimal protection.

QuickShip Aprons and Garments

Phillips Safety offers a line of Quickship aprons and garments. These products come in 0.5mm Pb Lead Equivalency in our Lightweight Lead and Lead Free Cores. Standard colors in both Nylon and Ripstop fabrics allow for a shipping time within 24 hours.

Axion Core Lead-Free Radiation Aprons and Garments

Phillips Safety introduces Axion Core™, our next-generation line of lead-free radiation aprons and garments.

By leveraging new advancements in manufacturing technology, Axion Core delivers the lightest weight core on the market today—without compromising shielding performance or safety. We have developed three distinct core options—Axion Core 1000, 2000, 3000, and Lightweight Lead — each engineered with a unique blend of bismuth, antimony, and rare earth elements.

These innovative lead-free solutions vary in weight to meet different user needs but never sacrifice protection, giving medical professionals the perfect balance of comfort, durability, and performance while ensuring the highest safety standards in radiation shielding.

Axion Core™ 1000

The most economical lead-free core in our lineup, Axion Core 1000 is also the heaviest of our non-lead options. Designed for facilities prioritizing cost-efficiency without sacrificing safety, it offers reliable protection at a value price point. At roughly 5% lighter than traditional lightweight lead cores on the market, it delivers measurable weight reduction while maintaining full compliance with radiation shielding standards.

Axion Core™ 2000

Our most popular core, Axion Core 2000 delivers a significant weight reduction compared to both traditional lead aprons and the Axion Core 1000. Offering the ideal balance of performance and value, this core is price-effective while providing the comfort needed for those who wear aprons for extended periods of time.

Axion Core™ 3000

The lightest core in our lineup, Axion Core 3000 represents a true engineering achievement. At 15-20% lighter than Axion Core 2000, this is one of, if not the lightest lead-free cores on the market today. This material allows us to deliver the lightest apron available in the Phillips Safety line, giving medical professionals the most comfort during long procedures. For those seeking the perfect combination of lightweight design and long-term durability, Axion Core 3000 is simply unmatched.

Lightweight Lead

Our Lightweight Lead Core is a specially formulated material engineered to reduce weight compared to standard, traditional lead cores—making it easier and more comfortable to wear without sacrificing dependable protection. While it's not as light as our Axion Core lead-free options, this formulation provides an excellent balance of affordability, performance, and reliability. A great price point and proven shielding performance make it a trusted choice for facilities seeking consistent protection with a lighter feel than conventional lead aprons.

FLEXIBACK / VELCRO CLOSURE

The Flexiback Frontal with Velcro Closure Apron effectively reduces radiation exposure. Designed to cover the front of the body from the shoulders to the thighs, it offers excellent anterior torso protection. The flexible back design and straps prevent slipping during procedures. For enhanced comfort and security, the apron includes a Velcro closure at the shoulders and on both sides of the waist. This ensures a snug fit by adhering to the front of the body. Additionally, the apron has a patch pocket on the front and shoulder pads to maximize wearer comfort.

The Flexiback Frontal with Velcro Closure is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. This apron is offered in seven sizes, ranging from XS to 3XL, and complies with the ASTM F3094-14 testing standard.

HOW TO MEASURE - FLEXIBACK FRONTAL

GENERAL MEASUREMENTS

1. CHEST

Measure the circumference under your arms around the widest part of your chest.

2. WAIST

Measure the circumference around the narrowest part of your waist.

3. HIPS

Measure the circumference around the widest part of your hips, keeping your feet close together.

ONE PIECE APRON

Measure the length from the highest point of your trapezius to the top of your knee.

SIZING CHART

UNISEX

Size Name	Chest Size	Length
XS	32" - 34"	30"
Small	34" - 36"	32"
Medium	36" - 38"	34"
Large	38" - 40"	36"
XL	40" - 43"	38"
2XL	43" - 46"	40"
3XL	46" - 50"	42"

Please note: Sizes below XS and above 3XL can be accommodated with custom sizing.

FLEXIBACK / BUCKLE CLOSURE

The Flexiback Frontal with Buckle Closure Apron effectively reduces radiation exposure. Designed to cover the front of the body from the shoulders to the thighs, the Flexiback Frontal offers excellent anterior torso protection. This lead apron features a flexible back design with straps to prevent slipping during procedures. Plus, it includes a back strap shoulder Velcro closure and a buckle closure around the waist, ensuring a snug fit. The Flexiback Frontal lead apron also has a patch pocket on the front and shoulder pads for maximum comfort.

The Flexiback Frontal with Buckle Closure is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. This apron is offered in seven sizes, ranging from XS to 3XL, and complies with the ASTM F3094-14 testing standard.

Please note: Sizes below XS and above 3XL can be accommodated with custom sizing.

FLEXIBACK / BACK SUPPORT

Say goodbye to procedural fatigue with the Phillips Safety Flexiback Frontal Apron with Back Support. Engineered for those who demand both high-level protection and ergonomic relief, the Flexiback system features an integrated back support belt designed to keep you comfortable from your first patient to your last.

Why Professionals Choose the Flexiback:

Dynamic Lumbar Support: The integrated back support belt is constructed with a bonded, elasticized panel that maintains its tension over time. It provides firm, consistent pressure to the lower back, encouraging better posture.

Gravity-Defying Weight Transfer: By engaging the specialized wide elastic belt, the apron's weight is shifted off your shoulders and redistributed to your hips. This significantly reduces the strain on your neck and upper spine.

No-Slip Design: A built-in Velcro backstrap secures the apron across the shoulder blades, ensuring it stays perfectly in place without sliding or requiring constant adjustment.

Premium Comfort Details:

High-Density Foam Padding: Softens the load on your shoulders for extended wear.

Integrated Front Pocket: Keeps your markers or essentials within easy reach.

Durable Elastic: The belt system is "stretch-resistant," meaning it won't lose its shape or support throughout the life of the apron.

TIE FRONT

The Tie Front Apron effectively reduces radiation exposure. Designed to cover the front part of the body, from the shoulders to the thighs, the Tie Front offers excellent anterior torso protection. This lead apron features a tie style strap closure, with tie straps attached to each side of the scapula. These tie straps are crisscross and are designed to fasten the apron to the body while maximizing adjustability, by crossing them around the back and tying them together at the front waist. Plus, this lightweight lead apron features a patch pocket on the front and shoulder pads to ensure maximum comfort.

The Tie Front is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. JACKET ONE-PIECE

The Jacket One-Piece Apron effectively reduces radiation exposure while providing great comfort. It covers the front and back of the body from the shoulders to the thighs, offering excellent anterior and posterior torso protection. The apron features a Velcro closure on the inside, allowing for adjustability and security. Additionally, it has a patch pocket on the front, shoulder pads, and a supportive back relief belt. This belt wraps around the back and locks in the front with a buckle, transferring weight from the shoulders to the waist to offer back relief.

The Jacket One-Piece is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. REVERSE FLEX JACKET ONE PIECE

The Phillips Reverse Flex Jacket offers a streamlined, one-piece design that merges high-level radiation protection with ergonomic relief. By integrating a specialized reverse-flex mechanism, this apron effectively transfers weight from the shoulders to the core, reducing fatigue during long procedures.

Key Features

Weight Distribution: The internal flex system shifts the apron's load to your hips, providing integrated lumbar support and shoulder relief.

Streamlined One-Piece Design: Unlike traditional multi-layered wraps, the one-piece construction eliminates bulky overlap, making it significantly lighter and more breathable.

Reverse-Flex Entry: Designed for effortless wearability, the reverse closure system allows for a secure fit with a quick "easy-on, easy-off" application.

Maximum Mobility: The jacket style is tailored to move with your body, ensuring full-coverage protection without sacrificing your range of motion.

SURGICAL DROP

The Surgical Drop Frontal Apron is a highly effective and comfortable option for reducing radiation exposure. This apron covers the front of the body from shoulders to thighs, leaving the back open. It features a convenient patch pocket on the front and shoulder pads for added comfort. The cross-shaped back straps prevent slippage during procedures, while Velcro on both sides of the waist ensures a secure fit.

The Surgical Drop is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. VEST & SKIRT FULL OVERLAP

The Vest and Skirt Apron is a comfortable two-piece apron that reduces radiation exposure effectively. It consists of two separate pieces: a vest and a skirt. The vest covers the front and back of the body, from the shoulders to the waist. The skirt covers the front and back below the waist and above the knees. Together, they provide excellent anterior and posterior torso protection from the shoulders to the thighs. Both the vest and the skirt feature a Velcro closure on the inside, ensuring adjustability and security. The vest also has a patch pocket on the front and shoulder pads for maximum comfort.

The Vest and Skirt Lead Apron is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. REVERSE VEST & SKIRT

The Reverse Vest and Skirt Apron is a comfortable two-piece apron used to effectively reduce radiation exposure. This is a popular style for vest and skirt combinations in Cath Labs, OR and Interventional departments. The Reverse Vest and Skirt Full Overlap lead apron comes with two separate pieces: as the name suggests, one is a vest, which covers the front and back of the body, from the shoulders to the waist, and the other is a skirt, covering the front and back below the waist and above the knees. Together, they provide great anterior and posterior torso protection, from the shoulders to the thighs. Velcro closures are located on the left shoulder and around the hips.

Made for both men and women, the Reverse Vest and Skirt Full Overlap Lead Apron is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000. It is possible to request them with either 0.35mm Pb lead equivalency or 0.50mm Pb lead equivalency. Both core materials pass the universally recognized testing procedure: ASTM F3094-14.

LAPGUARD

The LapGuard Apron is an excellent, flexible option for reducing radiation exposure. This apron covers the abdomen and pelvis. Its one-size-fits-all design ensures maximum adjustability and comfort. Plus, the apron is open at the back and features a buckle closure with straps. These straps wrap around and adjust at the waist, securing with a lock at the back.

The LapGuard is suitable for both men and women and is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. This apron is offered in three sizes, ranging from small to large, and complies with the ASTM F3094-14 testing standard.

Medium	30" - 32"	36" - 37"	20"
Large	33" - 35"	40" - 41"	21"
XL	36" - 38"	44" - 45"	22"
2XL	39" - 41"	46" - 47"	22"

Please note: Sizes below XS and above 3XL can be accommodated with custom sizing.

PREGNANCY MATERNITY PANEL

The Pregnancy Maternity Panel Apron is a highly effective, adjustable half lead apron designed to significantly reduce radiation exposure. This specialized pregnancy lead apron is a separate maternity panel that covers the belly, ensuring protection for critical areas. The Velcro band allows for easy adjustment around the waist, providing comfort and ample room for expansion during pregnancy.

Designed as a one size fits all, the Pregnancy Maternity Panel is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. This apron complies with the ASTM F3094-14 testing standard.

2XL	39" - 41"	46" - 47"	22"

Please note: Sizes below XS and above 3XL can be accommodated with custom sizing.

DENTAL APRON

The Dental Apron is an excellent choice for comfortable and effective radiation protection. Designed to cover the front of the body from the neck to just below the waist, this lead apron provides superior anterior torso protection, including the shoulders and thyroid. It features a quick and easy Velcro closure around the neck, ensuring adjustability and secure fit. Additionally, the dental apron includes hanging loops by the collar, making it easy to store on an apron hanger or peg rack.

Suitable for both men and women, this lead apron dental is available in four core materials: Lightweight Lead, Axion Core™ 1000, Axion Core™ 2000, and Axion Core™ 3000, each providing a 0.25mm, 0.35mm or 0.50mm Pb lead equivalency. You can choose between four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean, with color options in a variety of colors and bindings. This apron is offered in seven sizes, ranging from XS to 3XL, and complies with the ASTM F3094-14 testing standard.

HOW TO MEASURE - DENTAL APRON

GENERAL MEASUREMENTS

1. CHEST

Measure the circumference under your arms around the widest part of your chest.

2. WAIST

Measure the circumference around the narrowest part of your waist.

3. HIPS

Measure the circumference around the widest part of your hips, keeping your feet close together.

ONE PIECE APRON

Measure the length from the highest point of your trapezius to the top of your knee.

SIZING CHART

UNISEX

Size Name	Chest Size	Length
One Size - Adult	23"	33.5"

A large, stylized letter 'P' in a dark teal color serves as the background for the page. The 'P' is composed of thick, rounded strokes. The top curve is a wide, shallow arc. The vertical stem is a thick bar on the left side. The bottom curve is a wide, shallow arc that mirrors the top one. The central negative space of the 'P' is a solid dark teal circle.

EMBROIDERY

If you want a personalized lead apron, at Phillips Safety it is possible to add embroidered logos or text over the patch pocket. You can customize the text as you want it, as long as it features a maximum of 25 characters. Even better, you can choose from two different fonts: the classic sans-serif typeface Arial, or the script typeface Parkside. In addition, the text can be embroidered in any of the 9 colors below.
