PRODUCT INFORMATION

X RAY DOSIMETER TRAVEL BADGE PROTECTOR WITH .50MMPB | RA-DSBG-LF50

The X-Ray Dosimeter Travel Badge Holder is specifically designed to protect your dosimeter from false radiation readings during travel. Featuring .50mmPb equivalent shielding, this holder reduces unnecessary x-ray exposure from airport security scanners and other screening devices, ensuring your badge reflects only your true occupational dose.

Constructed from durable nylon, the lightweight holder provides a secure fit for your dosimeter, ensuring it stays protected during transit. This is an essential accessory for medical, dental, veterinary, chiropractic, imaging, and radiation professionals who carry their dosimeter outside of work, as well as TSA officials, law enforcement, and security personnel who may be required to travel with monitoring badges.

By shielding your badge from unnecessary radiation during travel, the X-Ray Dosimeter Travel Badge Holder helps maintain accurate dosimetry records and compliance with occupational safety standards.

Proudly made in the USA.
