LASER WARNING SIGNS

Laser warning signs are safety signs used to indicate the presence of laser beams or other potentially hazardous radiation. These signs are designed to warn individuals of the danger associated with the use of lasers, and they are commonly found in areas where lasers are used, such as laboratories and manufacturing facilities. They may vary depending on the type of laser and the level of danger associated with it.

At Phillips Safety, we take pride in providing our customers with a wide range of high-quality laser warning signs. Whether you have employees who handle and operate lasers or are working with low-power lasers with just a few milliwatts of output, it's important to properly warn and protect staff. Even low-power lasers can be dangerous to the human eye, making warning signs a necessity.

CATEGORY INFORMATION
LASER WARNING SIGNS

By using our superior laser warning signs, you can help ensure the safety of your workers and create a safer work environment. Phillips Safety's collection provides a variety of laser warning signs that come in both magnetic and plastic materials. Moreover, they are labeled with the specific type of laser radiation, such as 3A, 3B, 3R, and 4.

Furthermore, we offer a wide range of messages to choose from on our laser safety warning signs. Examples include, but are not limited to, "Laser Radiation – Avoid Direct Exposure to Beam", "Invisible Laser Radiation – Avoid Direct Exposure to Beam", "Visible and/or Invisible Laser Radiation – Avoid Direct Exposure to Beam", "Laser Radiation – Avoid Eye Or Skin Exposure To Direct or Scattered Radiation. Eye Protection Required", and "Laser Radiation – Do Not Stare Into Beam or View Directly with Optical Instruments".
