

# TRANSITION SAFETY GLASSES

MODEL SQ5062

## FRAME INFORMATION

The Transition Safety Glasses SQ5062 feature photochromic lenses that adjust automatically to changing light. These round safety glasses turn clear indoors and gray outdoors, making them ideal for jobs that move between indoor and outdoor environments. Their high-quality plastic frame is lightweight, highly durable, and impact resistant.

These safety glasses feature integrated side shields for additional lateral protection and come in nine color variations. In addition, the Transition Safety Glasses SQ5062 meet rigorous ANSI Z87+ standards for reliable protection.

Attention! Transitions lenses generally do not work in the car because they are activated by UV rays, and most car windshields have coating block UV.
