PRODUCT INFORMATION
BUTTON APRON SUSPENDERS

RA-BSUSP

The Button Apron Suspenders are designed to distribute weight more evenly across the shoulders and hips, reducing lower back strain and fatigue while improving overall stability. Permanently sewn onto compatible lead apron skirts, they provide enhanced comfort and support during extended procedures.

Made from a durable woven material, the adjustable straps allow for a secure, personalized fit and help keep the skirt properly positioned throughout the day. As a permanently integrated feature, these lightweight black suspenders deliver improved stability and a more ergonomic experience during everyday radiation protection wear.

Important: Button Apron Suspenders must be purchased with a compatible skirt, as the suspenders are permanently sewn into the garment and cannot be purchased separately.

2-Year Warranty – Radiation protection apparel is covered against manufacturing defects.
