PRODUCT INFORMATION

QUICKSHIP DENTAL LEAD APRON

QS-RA-DENT

The QuickShip Dental Lead Apron is a highly comfortable and effective solution for reducing radiation exposure. It covers the front of the body from the neck to just below the waist, ensuring excellent protection for the anterior torso, including the shoulders and thyroid. The apron stays securely in place with a quick and easy Velcro closure around the neck, offering both adjustability and security. Additionally, the lightweight lead apron can be conveniently stored using the hanging loops by the collar, suitable for apron hangers or peg racks.

Designed for both men and women, the QuickShip Dental Lead Apron is available in two core materials: lightweight lead, and economy lead-free, with a 0.25mm Pb lead equivalency. It comes in two durable outer materials—Nylon and Ripstop—and is available in various colors with black binding. Furthermore, this apron meets the rigorous standards of the ASTM F3094-14 testing procedures.

2-Year Warranty – Radiation protection apparel is covered against manufacturing defects.
