PRODUCT INFORMATION

QUICKSHIP TIE FRONT LEAD APRON

QS-RA-TF

The QuickShip Tie Front Lead Apron effectively reduces radiation exposure. It provides substantial anterior torso protection, covering the body from the shoulders to the thighs. The apron features an open-back design with a tie-style closure and straps attached near the scapula. These crisscross straps wrap around the back and tie at the front waist, ensuring a secure and adjustable fit. For added comfort, the apron includes a front patch pocket and shoulder pads.

Designed for both men and women, the QuickShip Tie Front Lead Apron comes in three core materials: Lightweight Lead and Axion Core™ 2000. Each provides a 0.50mm Pb lead equivalency. The high-quality Nylon outer material is available in blue or black with black binding. Plus, this lead apron comes in five sizes, from small to extra extra large. In addition, it complies with the ASTM F3094-14 testing standard.

2-Year Warranty – Radiation protection apparel is covered against manufacturing defects.
