PRODUCT INFORMATION

AXIGUARD

RA-AXIGD-PLF50

The AxiGuard provides targeted radiation protection for the underarm area, helping shield a critical region that may be left exposed by standard lead aprons. Worn comfortably beneath an existing radiation apron, AxiGuard adds an extra layer of protection without restricting movement, making it ideal for healthcare professionals performing radiation-intensive procedures.

Designed to fit comfortably under most lead aprons, AxiGuard features a front Velcro closure that allows for quick, easy adjustment and a secure, personalized fit. Available in seven sizes ranging from XS to 3XL, its lightweight construction provides dependable axillary coverage while maintaining freedom of movement throughout the workday.

Suitable for both men and women, the AxiGuard is available in Axion Core™ 3000. It offers 0.50 mm Pb lead equivalency for reliable radiation protection in high-exposure environments.
