PRODUCT INFORMATION
CUSTOM TRI-TOP STAINLESS STEEL WASTE CONTAINERS

Safely manage radioactive medical waste with the Phillips Safety Custom Tri-Top Stainless Steel Shielded Waste Container. Engineered for durability and radiation safety, this radioactive waste container is specifically designed for the rapid and secure disposal of gloves, syringes, and other small contaminated items.

Each Tri-Top Shielded Waste Container is custom manufactured to your specifications. It can be made in any size and with any lead thickness to meet the shielding and space requirements of your facility.

The standout feature of this container is the unique Tri-Top lid with a hinged-door system. This design ensures that the user remains shielded from the internal contents even while the lid is open for disposal. For easy maintenance and waste removal, two heavy-duty lifting handles allow the top to be removed once the contents have decayed.

Key Benefits

- Stainless Steel Construction: Built with high-grade stainless steel for a professional look that is easy to decontaminate and sanitize.
- Ergonomic Handling: Integrated handles facilitate safe lifting and emptying of the unit.
- Shielding Integrity: The lead lining is seamless, ensuring no radiation leakage during storage.
