PRODUCT INFORMATION
RECTANGLE BUNDLE COATED POSITIONERS
PPFP-KIT20

The Rectangle Bundle Coated Positioners is a kit that brings together a selection of foam rectangle positioners for patient support and positioning during medical imaging procedures. Available in four different thicknesses, the included positioners provide a range of options for different positioning needs.

The Rectangle Bundle includes **three of each** of the following:

- PPFP-PCBQ – Extra small Coated Rectangle Positioner
- PPFP-PCBR – Small Coated Rectangle Positioner
- PPFP-PCBS – Medium Coated Rectangle Positioner
- PPFP-PCBT – Large Coated Rectangle Positioner

For added durability, a medical-grade, fluid-resistant coating covers each foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioners are radiolucent, with low attenuation and minimal shadowing during imaging.

The positioners feature traditional non-flared edges. As a result, the edges may produce artifacts during imaging, particularly where the coating is applied.

Finally, the positioners included in the Rectangle Bundle are MRI Safe and latex-free. This makes the kit suitable for use across a variety of medical imaging environments.
