CT BUNDLE A FLARED EDGE COATED POSITIONERS

PPFP-KIT4

The CT Bundle A Flared Edge Coated Positioners is a kit that brings together a selection of foam positioners for patient support and positioning during CT and medical imaging procedures. Designed for CT imaging environments, it includes wedges, wedge sets, and a headrest for a range of positioning needs.

The CT Bundle A includes **one of each** of the following:

- PPFP-PCBB – Medium 45 Degree Spinal Flared Edge Coated Wedge
- PPFP-PCBC – Small 45 Degree Spinal Flared Edge Coated Wedge
- PPFP-PCBE – 34 Degree Flared Edge Coated Wedge Set
- PPFP-PCBF – 27 Degree Flared Edge Coated Wedge
- PPFP-PCBG – 21 Degree Flared Edge Coated Wedge
- PPFP-PCBI – 15 Degree Flared Edge Coated Wedge Set
- PPFP-PCBJ – 12 Degree Flared Edge Coated Wedge Set
- PPFP-PCBW – CT Coated Headrest

For added durability, a medical-grade, fluid-resistant coating covers each foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. The flared edge positioners are radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design featured on the flared edge positioners helps significantly reduce artifacts during X-ray imaging. Although the flared sides increase the overall size of the positioners, they do not affect imaging or positioning. The CT Coated Headrest has a traditional non-flared design and is not radiolucent.

Finally, the positioners included in CT Bundle A are MRI Safe and latex-free. This makes the kit suitable for use across a variety of medical imaging environments.
