PRODUCT INFORMATION

CHILD FLARED EDGE COATED HEAD HOLDER

PPFP-PCAN

The Child Flared Edge Coated Head Holder supports and positions the head during medical imaging procedures. Measuring 11" L × 9.75" W × 5" H, its contoured design helps hold a child's head in position for AP/PA imaging.

For added durability, a medical-grade, fluid-resistant coating covers the foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioner is radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design uses flared edges to significantly reduce artifacts during X-ray imaging. Although the flared sides increase the overall size, they do not affect imaging or positioning.

Finally, the Child Flared Edge Coated Head Holder is MRI Safe and latex-free. This makes it suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: 32 oz

SHIPPING DIMENSIONS: 17 × 9 × 9 in

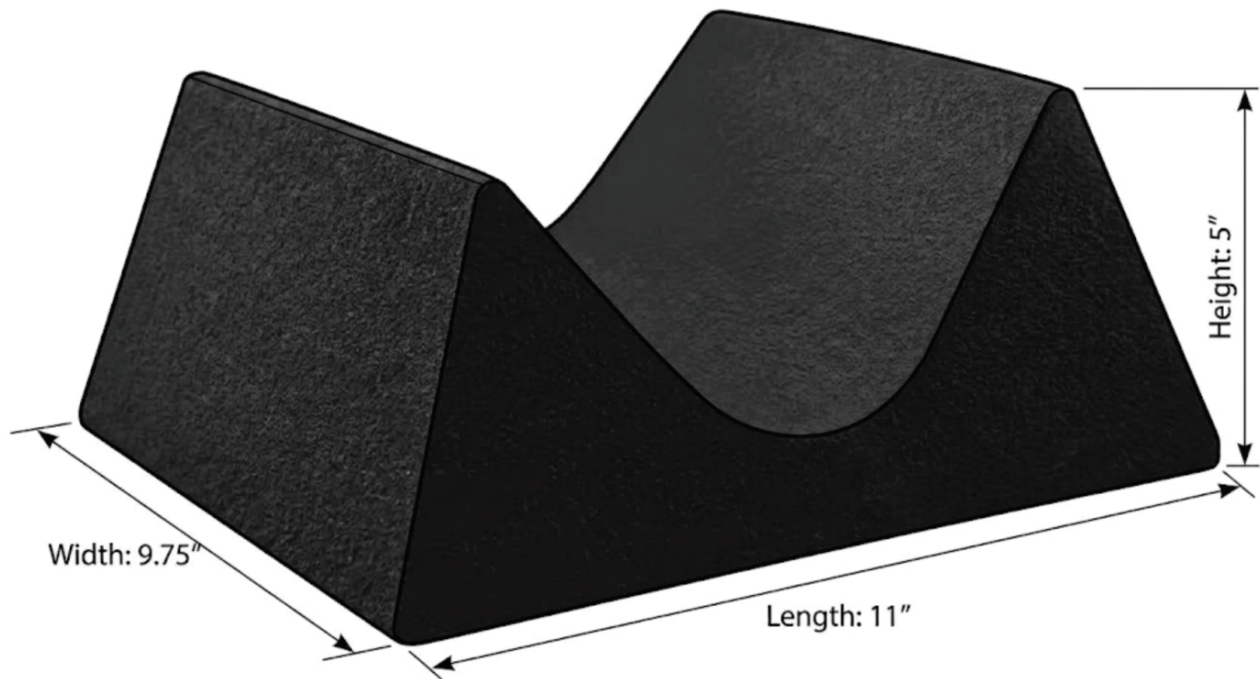

PRODUCT DIMENSIONS: 11" L × 9.75" W × 5" H

MATERIAL: Coated Foam

POSITIONER TYPE: Neck & Head Positioners

FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
