PRODUCT INFORMATION

CHILD FLARED EDGE COATED HEAD IMMOBILIZER

PPFP-PCAQ

The Child Flared Edge Coated Head Immobilizer provides support and positioning for a child's head during medical imaging procedures. Measuring 11.5" L x 6.75" W x 5.25" H, its contoured center helps support the head and maintain positioning during imaging.

For added durability, a medical-grade, fluid-resistant coating covers the foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioner is radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design features flared edges that help significantly reduce artifacts during X-ray imaging. While the flared sides increase the overall size of the positioner, they do not affect imaging or positioning.

Finally, the Child Flared Edge Coated Head Immobilizer is MRI Safe and latex-free. This makes it suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: 32 oz

SHIPPING DIMENSIONS: 17 x 9 x 9 in

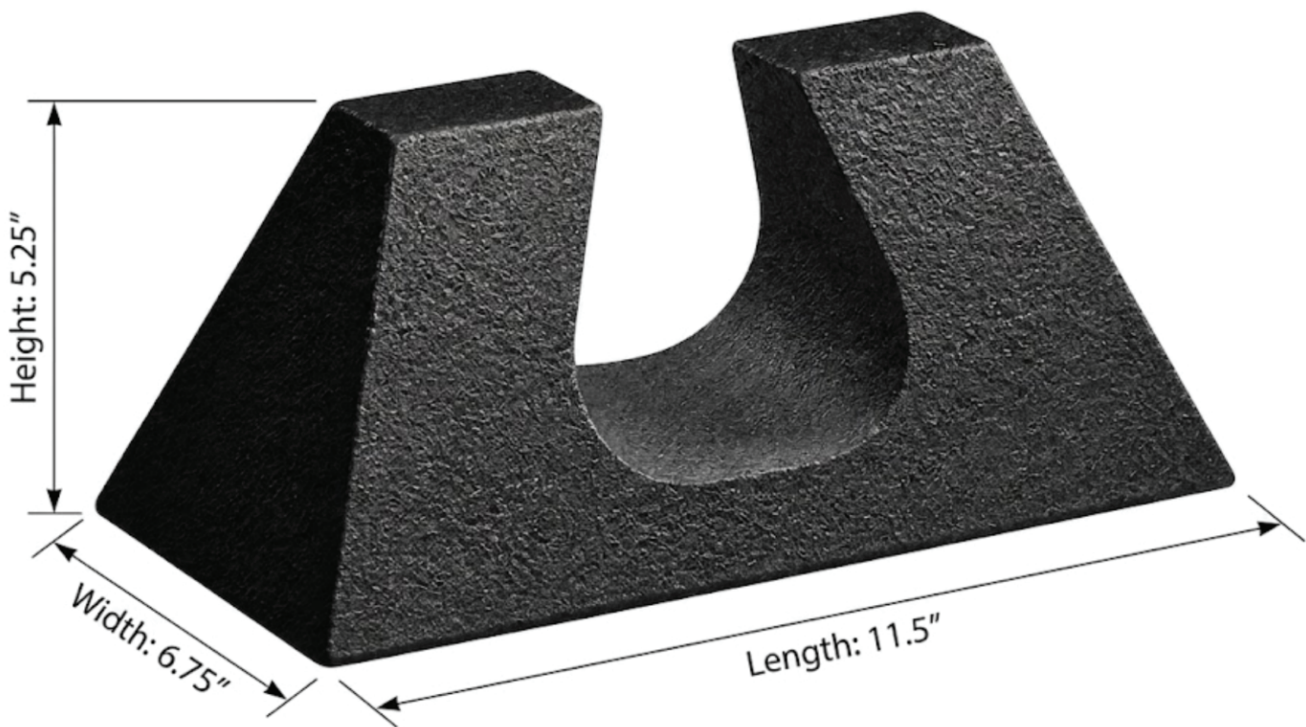

PRODUCT DIMENSIONS: 11.5" L x 6.75" W x 5.25" H

MATERIAL: Coated Foam

POSITIONER TYPE: Neck & Head Positioners, Pediatric

FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
