PRODUCT INFORMATION
BARIATRIC FLARED EDGE COATED RECTANGLE POSITIONER
PPFP-PCBM

The Bariatric Flared Edge Coated Rectangle Positioner provides stable support for patient positioning during medical imaging procedures. It measures 12" L x 8" W at the top and 14.5" L x 10.5" W x 3" H at the base. Its wider flared base provides a larger support surface while maintaining a flat positioning area on top.

For added durability, a medical-grade, fluid-resistant coating covers the foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioner is radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design features flared edges that help significantly reduce artifacts during X-ray imaging. While the flared sides increase the overall size of the positioner, they do not affect imaging or positioning.

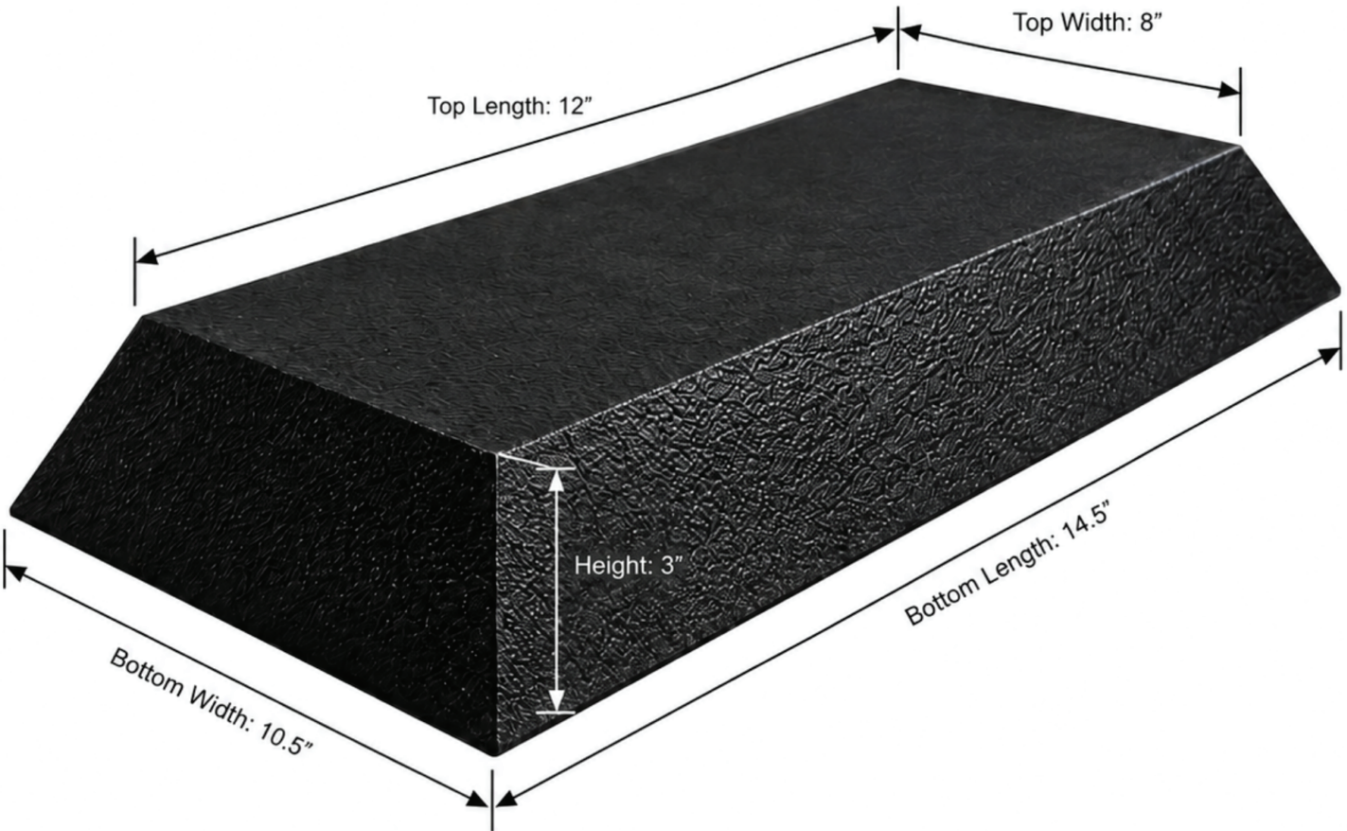

Finally, the Bariatric Flared Edge Coated Rectangle Positioner is MRI Safe and latex-free. This makes it suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: 32 oz
SHIPPING DIMENSIONS: 14 x 20 x 6 in
PRODUCT DIMENSIONS:
Top: 12" L x 8" W / Base: 14.5" L x 10.5" W x 3" H

MATERIAL: Coated Foam
POSITIONER TYPE: Positioning Rectangles
FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
