PRODUCT INFORMATION

45 DEGREE ECHOCARDIOGRAPHY FLARED EDGE COATED WEDGE

PPFP-PCEE

The 45 Degree Echocardiography Flared Edge Coated Wedge provides angled support for patient positioning during echocardiography and medical imaging procedures. Measuring 38.25" L x 13" W x 9" H, its 45 degree wedge design provides a large, angled surface for patient support and positioning.

For added durability, a medical-grade, fluid-resistant coating covers the foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioner is radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design features flared edges that help significantly reduce artifacts during X-ray imaging. While the flared sides increase the overall size of the positioner, they do not affect imaging or positioning.

Finally, the 45 Degree Echocardiography Flared Edge Coated Wedge is MRI Safe and latex-free. This makes it suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: 112 oz

SHIPPING DIMENSIONS: 14 x 14 x 40 in

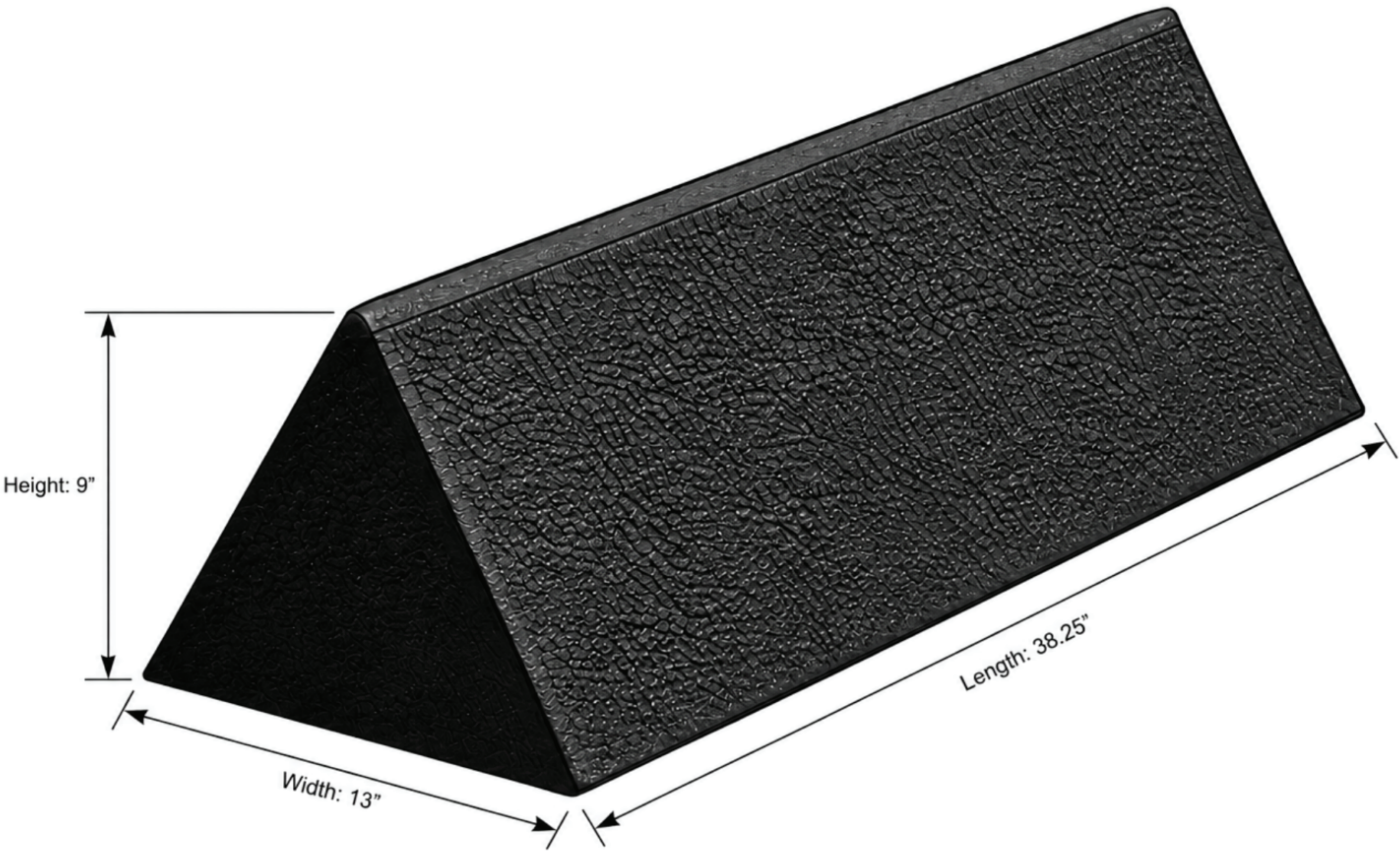

PRODUCT DIMENSIONS: 38.25" L x 13" W x 9" H

MATERIAL: Coated Foam

POSITIONER TYPE: Positioning Wedges

FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
